

## **Cherry BX-2 Supplement #7**

## Stick protection – to avoid FO in the control-area D 099 A

Nov 2000

A protection should be installed in order to avoid any FO (foreign object) falling into the stick area in the seat which could block the controls.

Any stiff protection cover attached to the seat / seat-cushion should work.

The attached drawing (D 099 A) shows a cover from a gear shift stick of a BMW 3-series (1990) fitted to the Cherry seat with a 1.5 mm aluminum sheet metal.

Note: Max did include this drawing to the drawing set later - No. D 129.
